## Transition to Practice – Mental Health

Claire Somers

Nurse Educator – WACHS Mental Health

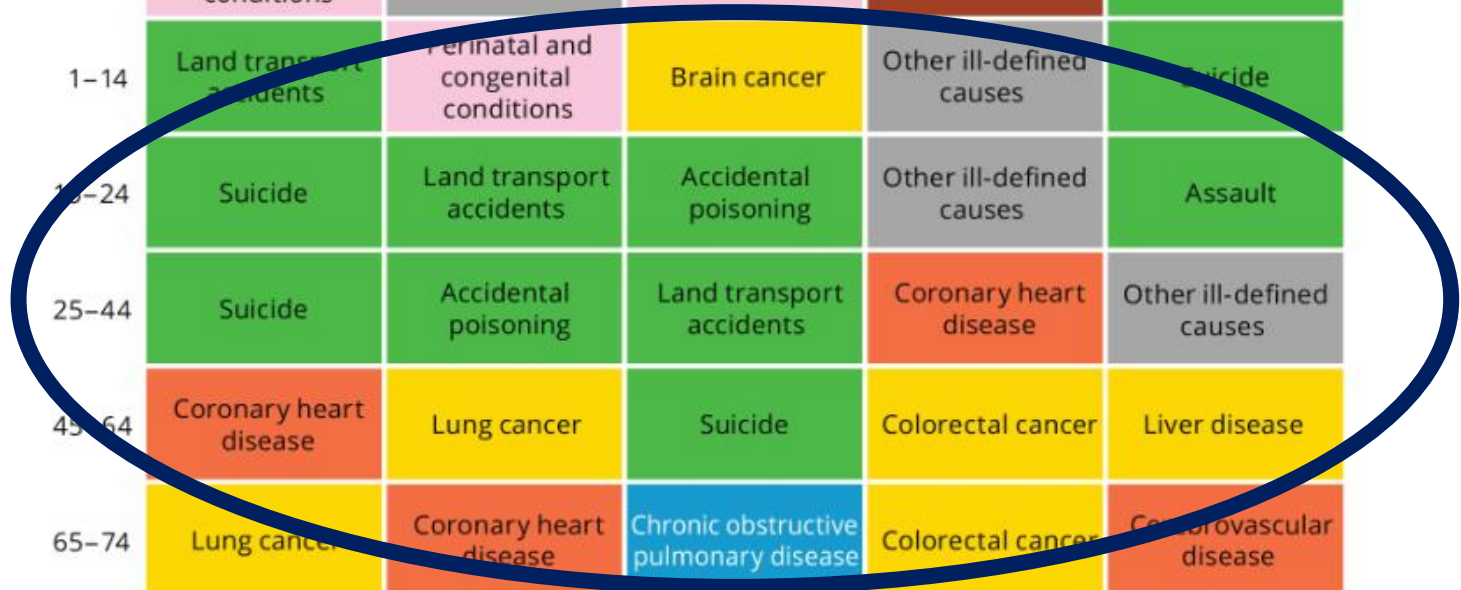

We acknowledge the individual and collective experience of those with living or lived experience of mental health, alcohol and other drugs. We recognise their vital contribution at all levels, including those present today who bring their consumer or carer expertise to share. We also recognise their voice, insight, and the emotional energy that it takes to share this expertise which is essential to achieve better outcomes for all.

Age group (years)	Rank				
	1st	2nd	3rd	4th	5th
Under 1	Perinatal and congenital conditions	Other ill-defined causes	Sudden infant death syndrome	Selected metabolic disorders	Accidental threats to breathing
